Investigator Narrative

Decedent: BUENO, Eric Steven
Case Number: 2014-03486
Investigator: Rafael Plasencia

First Call Information:

On Saturday, December 6, 2014, about 2000 hours, Alameda County Deputy Sheriff R. GARRIGAN called and reported the death of Eric Steven BUENO. Deputy GARRIGAN reported the following: BUENO was a 46-year-old male who died in his cell (Housing Unit 7, cell B-1) at Santa Rita Jail in Dublin. About 1858 hours, Deputy G. RESENDES, who was assigned to Housing Unit 7, found BUENO suspended off the ground, hanging from his neck and ankles, by a long strip of bed sheet that was tied around the top bunk of his cell. Deputy RESENDES cut BUENO down and requested medical assistance. Corizon Nurses responded to the scene and initiated CPR. ALCO Fire arrived shortly after and determined death at 1928 hours due to no detectable heart rhythm. BUENO did not have a cell mate and was alone in his cell. BUENO was last seen alive earlier in the day about 1545 hours when Housing Unit 7 served dinner. (RRP1868)

Medical Summary:

According to Corizon Health Care, BUENO had no known medical history and no County Jail Mental Health (CJMH) history. The only medication BUENO was taking was [REDACTED] (RRP1868)

Description of the Death/ Injury Scene:

BUENO died in his cell (Housing Unit 7, cell B-1), at the Santa Rita Jail in Dublin. (RRP1868)

Body Identification:

BUENO was originally identified by the Alameda County issued identification wrist band that he wore. I (PLASENCIA) also located photographs of him and identification information from CRIMS and Cal Photo which was used to identify BUENO by his likeness to the photographs. (RRP1868)

On December 12, 2014, I (HORN) received a document from the Central Identification Bureau (CIB) via QIC code that confirmed fingerprints submitted for the decedent matched those on file for PFN: [REDACTED] associated with Eric Steven BUENO. The document was placed in the case file. (JDH1724)

Next of Kin Investigation:

The two page suicide note recovered from BUENO's cell desk listed three possible family members along with contact telephone numbers. The note read: [REDACTED]

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 480 4th Street, Oakland, CA
94607-3829
(510) 268-7300 / (510) 268-7333 (fax)

As of 12/7/2014, about 0324 hours, NOK/family had not been notified. (RRP1868)

On December 9, 2014, about 0800 hours, I (GOGNA) spoke with Eric's father [REDACTED] and notified him of the death. According to him, [REDACTED] was divorced and had no children. Based on this information, [REDACTED] would be his legal next of kin. (AG#1303)

Other Agency Reports:

Refer to Alameda County Sheriff's Office report #14-021275. (RRP1868)

On April 10, 2015, I (PLASENCIA) printed a copy of the Alameda County Sheriff's Office report #14-021275. I reviewed the report and its contents were consistent with my findings. A copy of the report was placed into the case file. (RRP1868)

Property and Evidence:

I (PLASENCIA) issued property receipt #35337 for the body, clothing, and property items in this case to Alameda County Sheriff's Office Sgt. BASILIO. (RRP1868)

On December 17, 2014, all property associated with this case was released to the next of kin, [REDACTED] (RRP1868)

Coroners Fees:

The following Coroner's Fees apply in this case: Body removal (\$254) and body preparation (\$67) for a total of \$321.00. (RRP1868)

As of December 23, 2014, all associated fees with this case were paid in full. See accounting receipt #05871. (RRP1868)

Other Investigative Details/ Supplemental Information:

On December 6, 2014 about 2143 hours, Deputy WILLIAMS and I (PLASENCIA) arrived at Santa Rita Jail in Dublin. BUENO was lying face up on the floor of his cell, Housing Unit 7, cell B-1. He was wearing Alameda County Jail issue clothing and the top was partially cut off exposing his upper torso. There was medical therapy attached to BUENO'S body and everything was left in place. I examined his body and saw very distinct ligature marks along with small traces of blue bed sheet around his neck. He also had strips of blue bed sheet tied around his ankles as well. [REDACTED]

Alameda County Sheriff's Office
Gregory J. Ahern, Sheriff / Coroner
Coroner's Bureau, 480 4th Street, Oakland, CA
94607-3829
(510) 268-7300 / (510) 268-7333 (fax)

Deputy WILLIAMS and I moved BUENO onto a gurney and into the Coroner's van for transportation back to the Coroner's Bureau without incident.

On December 7, 2014, about 0010 hours, we returned to the Coroner's Bureau and processed BUENO's body into the morgue and took intake photographs. (RRP1868)

On December 10, 2010, Coroner's Pathologist Dr. Judy MELINEK conducted a full autopsy on Eric BUENO. The cause of death was listed as "Hanging". (RRP1868)

On December 22, 2014, Central Valley Toxicology (CVT) conducted a complete drug screen on a peripheral blood sample from Eric BUENO. The complete drug screen yielded the following results: Methamphetamine was detected. No other common acidic, neutral or basic drugs were detected and no Ethyl Alcohol was detected. (RRP1868)

On December 13, 2014, Jesse MARQUEZ from Deer Creek Mortuary in Dublin arrived at the Coroner's Bureau to take custody of Eric BUENO for final disposition. [REDACTED] authorized the release. (RRP1868)

Findings:

On Friday, April 10, 2015, I (PLASENCIA) reviewed this case to determine a manner of death. A full autopsy was performed by Coroner's Pathologist Dr. Judy MELINEK on Eric Steven BUENO to determine a cause of death. Dr. MELINEK listed the cause of death as "Hanging". Based on the listed cause of death, my death scene investigation, and evidence recovered from the scene, I determine the manner of death for this case to be a suicide. (RRP1868)

Supervisor Review:

On Monday, April 13, 2015, I (Lt. Bowers) reviewed this report for closure. I concur with the content and findings. I consider this case closed. (rmb#906)

DATE: December 10, 2014
FROM: Judy Melinek, M.D.
TO: Case File 2014-03486
SUBJECT: AUTOPSY PROTOCOL

Autopsy performed upon the body of Eric Steven Bueno at the Coroner's Bureau, 480 4th Street, Oakland, California, on December 10, 2014, at 9:25 a.m.

AUTOPSY FINDINGS

- I. HANGING:
 - A. LIGATURE FURROW COMPLETELY ENCIRCLES NECK, ELEVATES TOWARDS RIGHT
 - B. FACIAL PALLOR
 - C. LIGATURE SUBMITTED AS EVIDENCE.
- II. HYPERTENSIVE CARDIOVASCULAR DISEASE:
 - A. 460 GRAM HEART WITH BIVENTRICULAR HYPERTROPHY.
- III. LEFT TESTICULAR FIBROSIS.
- IV. ACUTE METHAMPHETAMINE INTOXICATION (SEE TOXICOLOGY REPORT):
 - A. D-METHAMPHETAMINE = 0.11 MG/L
 - B. D-AMPHETAMINE = NEGATIVE.

CAUSE OF DEATH: HANGING.

cc: EMS
Investigations Bureau

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

1 **PRELIMINARY EXAMINATION:** The body is identified by a Coroner's
2 label affixed to the right great toe, and a jail label
3 encircling the right wrist. Brown paper bags encircle the
4 hands. When first viewed, the decedent is clad in an orange t-
5 shirt (cut); yellow jail-issued pants; brown boxer underpants;
6 and two gray socks. Torn blue cloth accompanies the body and is
7 described below. Blue cloth restraints/ligatures encircle both
8 ankles twice, are both knotted twice with granny knots (tighter
9 on the left). On the left there is a 33 inch length of fabric
10 extending to a double knot with two loose ends, a 9 inch long
11 one and an 11 inch long one. There is an additional 11 inch
12 loose end emanating from the knot at the outer left ankle. At
13 the right ankle there is a double knot with two loose ends, one
14 measuring 8 inches and the other measuring 6 inches. The
15 clothing and accompanying blue cloth are submitted as evidence.

16

17 **EXTERNAL EXAMINATION:** The body is of a well developed, well
18 nourished, fit and muscular adult Caucasian man whose appearance
19 is consistent with the reported age of 46 years. The body is
20 cold (refrigerated). Rigor mortis is marked and symmetric.
21 Fixed red livor mortis extends over the posterior surfaces of
22 the body, except in areas exposed to pressure. There are early

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

23 putrefactive changes manifested by a slight green discoloration
24 over the abdomen.

25

26 The face is unremarkable without visible injury. The head is
27 atraumatic, symmetric, and normocephalic. The scalp is intact
28 and atraumatic. The scalp hair is reddish gray and straight,
29 and measures approximately 1/8 inch in length over the crown.

30 The eyelids are atraumatic, intact, and unremarkable. The
31 irides are blue. The pupils are bilaterally equal at 0.3 cm.
32 The corneas are translucent. The sclerae and conjunctivae are
33 pale and unremarkable without petechiae or hemorrhages. No
34 petechial hemorrhages are identified on the palpebral

35 conjunctivae, bulbar conjunctivae, facial skin or oral mucosa.

36 The nose and ears are not unusual except for two pierce marks in
37 the left earlobe. The decedent wears a 1/8 inch grayish red
38 mustache and beard. The teeth are natural and in good
39 condition.

40

41 The neck is remarkable for evidence of injury, as mentioned
42 below. The trachea is palpable and midline. The thorax is well
43 developed and symmetrical. The abdomen is flat. The anus and
44 back are unremarkable. The penis is circumcised. The testes

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

45 are bilaterally descended in the scrotum. The breasts are well
46 developed, without palpable masses. The genitalia are those of
47 a normal adult female. The upper and lower extremities are well
48 developed and symmetrical, without absence of digits. There is
49 no clubbing or edema.

50

51 **EVIDENCE OF MEDICAL THERAPY:** Evidence of acute medical therapy
52 includes four electrocardiogram patches on the shoulders and
53 abdomen and defibrillator patches on the chest.

54

55 **IDENTIFYING MARKS AND SCARS:** A monochromatic professional
56 tattoo inscribed "Forever and a day" is on the upper chest below
57 both clavicles. A polychromatic professional tattoo inscribed
58 "XXX AKA Gidget" is on the upper left chest. A monochromatic
59 professional tattoo of four Chinese letters is at the upper
60 outer left chest near the axilla. A monochromatic professional
61 tattoo depicting a demon is on the lower outer left chest. A
62 monochromatic professional tattoo depicting a panther head is on
63 the upper right chest. A polychromatic professional tattoo
64 depicting the letter "A" within a circle is on the left abdomen.
65 A monochromatic professional tattoo of a cross inscribed
66 "Tiffany Adrienne" is on the outer right abdomen and flank. A

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

67 monochromatic professional tattoo inscribed "BUENO" is on the
68 upper back, at the base of the neck. A monochromatic
69 professional tattoo inscribed "NOR ★ CAL Peckerwood" is on the
70 lower back above the buttocks. A monochromatic professional
71 tattoo depicting a female warrior figure is on the upper outer
72 right arm and is above a tattoo depicting either barbed wire or
73 a flame motif encircling the upper right arm. A monochromatic
74 professional tattoo depicting a demon is on the upper outer left
75 arm. A monochromatic professional tattoo inscribed "Tiffany"
76 over a key is at the volar left wrist. A sleeve-like tattoo
77 extends from the left thigh to the ankle on both the front and
78 back of the left leg and depicts numerous demons and skulls. A
79 monochromatic professional tattoo of a graphic design is on the
80 outer right calf. A monochromatic professional tattoo encircles
81 the mid-right calf and is inscribed "Kathy ★ Ron ★ Dustin ★
82 Taylor." There are irregular hyperpigmented well healed scars
83 ranging in size from 1/4 to 2-1/2 inches at the lower right leg
84 and shin. Three 1/4 inch scars have a central scab measuring
85 1/4 inch and 1/8 inch on the upper and lower outer right knee,
86 respectively. Additional identifying marks and scars are not
87 readily identified.

88

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

89 EVIDENCE OF INJURY:

90 HANGING: A ligature furrow completely surrounds the neck. It
91 ranges from 3/8 to 1/2 inch wide. At the front of the neck it
92 goes horizontally but elevates slightly behind the right ear.
93 At the front and left the furrow is most prominently dry,
94 leathery and tan. It is positioned approximately 1 inch below
95 the right lobule and 2-1/4 inches below the left lobule.

96

97 Accompanying the body are blue cloths which match in appearance
98 to the restraints/ligatures surrounding the ankles. One is 27
99 inches in length and has been cut at both ends. The other has a
100 complex knot with three loose ends each measuring 13 inches.

101

102 Internally, there are no fractures of the hyoid, thyroid,
103 cricoid cartilages or vertebrae without hemorrhage into the soft
104 tissue. There are no petechial hemorrhages of the face,
105 sclerae, conjunctivae, larynx, oropharynx, or nasopharynx.
106 There is relative facial pallor. The tongue does not protrude
107 and on cut section there are no hemorrhages in the muscle.

108

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

109 The ligatures are labeled and submitted into evidence with the
110 cloth encircling the ankles which have been cut and
111 reapproximated to reproduce the loops surrounding the ankles.

112

113 **OTHER INJURIES:** An 8 inch by 3 inch aggregate of parallel
114 linear red abrasions (scratch marks) some of which appear fresh
115 and some of which are scabbed are on the upper back. These are
116 oriented diagonally.

117

118 *The injuries above, having been described once, will not be*
119 *repeated.*

120

121 **INTERNAL EXAMINATION:** The body is opened in the usual manner
122 with a Y-shaped incision. No adhesions or abnormal collections
123 of fluid are in any of the body cavities. All body organs are
124 in normal and anatomic position. The serous surfaces are smooth
125 and glistening. The subcutaneous fat measures approximately
126 1/2-inch in maximum thickness at the level of the umbilicus.

127

128 **HEAD AND CENTRAL NERVOUS SYSTEM:** Reflection of the scalp shows
129 the usual scattered reflection petechiae. The calvarium is
130 intact. The brain weighs 1500 grams. The dura mater and falx

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

131 cerebri are unremarkable and the leptomeninges are thin and
132 delicate. The cerebral hemispheres are symmetrical. The
133 structures at the base of the brain, including cranial nerves
134 and blood vessels, are free of abnormality.

135

136 Sections through the cerebral hemispheres reveal no lesions
137 within the cortex, subcortical white matter or deep parenchyma
138 of either hemisphere. The cerebral ventricles are of normal
139 caliber. Sections through the brain stem and cerebellum are
140 unremarkable. The first portion of the spinal cord, viewed
141 through the foramen magnum, is unremarkable.

142

143 **NECK:** The neck is dissected after the thoracoabdominal and
144 cranial contents are removed. Examination of the soft tissues
145 of the neck, including large vessels and strap muscles, reveals
146 no abnormalities. The superficial and deep muscles of the neck
147 are firm, red-brown, intact, and unremarkable without hemorrhage
148 or laceration. The hyoid bone and larynx are intact. The
149 tongue is normal.

150

151 **CARDIOVASCULAR SYSTEM:** The heart weighs 460 grams. The
152 epicardial surfaces are smooth, glistening, and unremarkable.

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

153 The coronary arteries arise normally and follow the distribution
154 of a right dominant pattern with no atherosclerosis. The
155 chambers demonstrate biventricular hypertrophy and valves bear
156 the usual size/position relationship, are morphologically normal
157 and are unremarkable. The valves are free of vegetations. The
158 myocardium is dark red-brown, firm, and unremarkable. The
159 atrial and ventricular septa are intact and the septum and free
160 walls are free of muscular bulges. There is no focal or
161 regional fibrosis, erythema, pallor or softening. The left
162 ventricle measures 1.5 cm and the right ventricle measures
163 0.5 cm in thickness as measured 1 cm below the respective
164 atrioventricular valve annulus. The interventricular septum
165 measures 1.1 cm in thickness. The aorta and its major branches
166 arise normally and follow the usual course with no significant
167 atherosclerosis. The orifices of the major aortic vascular
168 branches are patent. The vena cava and its major tributaries
169 return to the heart in the usual distribution and are
170 unremarkable.

171
172 **RESPIRATORY SYSTEM:** The right and left lungs weigh 560 and 530
173 grams, respectively. The upper and lower airways are patent and
174 the mucosal surfaces are smooth, yellow-tan, and unremarkable.

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

175 The pleural surfaces are smooth, glistening, and unremarkable.
176 The pulmonary parenchyma is red and the cut surfaces exude
177 moderate amounts of blood and frothy fluid. There are no
178 masses, hemorrhages, consolidations, obstructions or destructive
179 emphysema. The pulmonary arteries are normally developed and
180 patent. There is no saddle embolus on *in situ* examination of
181 the pulmonary trunk.

182

183 **HEPATOBIILIARY SYSTEM:** The liver weighs 1950 grams. The hepatic
184 capsule is intact, smooth and glistening, covering red-brown
185 parenchyma. The gallbladder contains approximately 10 mL of
186 green viscid bile without stones. The extrahepatic biliary tree
187 appears to be patent.

188

189 **HEMATOPOIETIC SYSTEM:** The spleen weighs 110 grams and has a
190 smooth intact capsule covering red-purple, moderately firm
191 parenchyma. The splenic white pulp is grossly unremarkable.
192 The regional lymph nodes appear normal. The bone marrow (rib)
193 is red-purple.

194

195 **ENDOCRINE SYSTEM:** The pituitary gland is intact, normally
196 developed, and is unremarkable without laceration, hemorrhage,

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

197 or mass lesion. The thyroid gland is symmetric and unremarkable
198 with a firm, red-brown, granular parenchyma and no cyst,
199 hemorrhage, fibrosis, or mass lesion. The adrenal glands are
200 normally situated and have soft, yellow cortices and soft, gray-
201 brown medullae. The pancreas has a soft, tan parenchyma with a
202 normal lobular architecture and no saponification, pseudocyst,
203 neoplasm, fibrosis, hemorrhage, or mineralization.

204

205 **GASTROINTESTINAL SYSTEM:** The esophagus is lined by gray-white,
206 smooth mucosa. The gastric mucosa is arranged in the usual
207 rugal folds, and the lumen contains approximately 550 mL of
208 light brown fluid with partially digested vegetable material.
209 There are no pill fragments or foreign bodies identified. The
210 small and large bowels are unremarkable. The appendix is
211 unremarkable. The colon contains soft and green stool.

212

213 **GENITOURINARY SYSTEM:** The right and left kidneys weigh 150 and
214 170 grams, respectively. The renal capsules are smooth, thin,
215 semitransparent, and strip with ease from the underlying,
216 smooth, red-brown, firm, cortical surfaces. The cortices are of
217 normal thickness and well-delineated from the medullary
218 pyramids. The calyces, pelves, and ureters are unremarkable.

Sheriff-Coroner
Alameda County

Body of ERIC STEVEN BUENO

219 The urinary bladder contains approximately 25 mL of urine. The
220 mucosa is gray-tan and smooth. The right testis is
221 unremarkable. The left testis is firm, pale and fibrotic. The
222 prostate is unremarkable.

223

224 **MUSCULOSKELETAL SYSTEM:** The skeleton is well developed and
225 without deformity or osteoporosis. The vertebrae, clavicles,
226 sternum, ribs, and pelvis are without fracture. The supporting
227 musculature and soft tissues are not unusual. The firm, red-
228 brown muscles are well hydrated and free of focal lesions. The
229 cervical spinal column is stable on internal palpation.

230

231 **Spec. to Pathology:** Portions of all major organs are fixed in
232 formalin and retained.

233

234 **Spec. to Histology:** None.

235

236 **Spec. to Toxicology:** Peripheral and heart blood, bile, brain,
237 gastric contents, liver, urine, vitreous
238 humor.

239

240 **Physician(s) Present:** Dr. Judy Melinek.
